Installation Notes

In order to successfully install ApproveIt Desktop Demo, MS-Office should be already installed.

The installation type selected during ApproveIt Desktop Demo installation should be "Typical"; this means that you will install the ApproveIt modules for which the associated host application exists, e.g. ApproveIt for Office is only installed if Microsoft Office is installed.
ApproveIt Desktop Demo version installation creates a Start menu program group "ApproveIt Desktop".

Un-installation Notes

You may uninstall ApproveIt Desktop Demo version by selecting "Uninstall ApproveIt Desktop Demo" from the **Start -> Programs -> ApproveIt Desktop -> Uninstall ApproveIt Desktop Demo**.
Please note that selecting Uninstall ApproveIt Desktop Demo removes all the files created during installation. Files that were created after installation remain intact after uninstalling ApproveIt Desktop Demo Version.

Known Issues

When using ApproveIt for Office within Microsoft Internet Explorer (IE), the following limitations exist:
- o All instances of Microsoft Word and Microsoft Excel must be closed before opening a document for approval in Internet Explorer.
- o Batch operations may cause issues under some platforms when working with Internet Explorer.
- o The Save Unsigned Copy feature may cause issues under some platforms when working with Internet Explorer.
- o All files must be closed before closing Microsoft Word and Microsoft Excel when working with Internet Explorer.
