[Audio Acrobat](#)

We currently use this service ourselves and like it so much, we had a hard time holding it back from recommendations. What sets this service apart from the rest, and why I choose to use it, is the fact that this service allows you to create full one hour audios anytime you want, through your regular telephone and NOT your microphone.

Plus you get a copy of the original mp3 file you create to upload to your own server right after you create it. I was amazed at how user friendly this site is. And almost forgot, you can also record conference calls up to 2 hours long, which is one of the most popular features of this service.
