Screen 4: Reports

8.0 FAQ

Q. Please provide default setting information?

A. default setting of EasySMS Outlook given blow

| | |
|------------------------------------|--|
| User/Password | system@netshell/manager , system@starlink/manager |
| EasySMS Outlook default port set | 8020 TCP/8021 TCP |
| EasySMS Outlook Configuration File | client.exe.config |
| Location of configuration file | C:\Program Files\Common Files\Babu Software\EasySMS Outlook\ |

Q. Can Change of EasySMS Outlook port is possible?

A. yes change of port is possible.

Q. How to change EasySMS Outlook port?

A . Find out NetShell service host and port then Open Configuration file “client.exe.config” in notepad. For Example I found that my NetShell service is running 9020 port host localhost so change port is required from

8020 to 9020

Change value from

```
<client url="http://localhost:8020/RemotingSMS">  
<wellknown type="service.netshell.ServiceNeXT, service.netshell"  
url="http://localhost:8020/RemotingSMS/ServiceNeXT.soap" />  
</client>
```

to

```
<client url="http://localhost:9020/RemotingSMS">  
<wellknown type="service.netshell.ServiceNeXT, service.netshell"  
url="http://localhost:9020/RemotingSMS/ServiceNeXT.soap" />  
</client>
```

Find out StarLink service host and port, then Open Configuration file "client.exe.config" in notepad. For Example I found that my StarLink service is running 9021 port host localhost so change port is required from 8021 to 9021

Change value from

```
<client url="http://localhost:8021/RemotingSMS">  
<wellknown type="service.starlink.ServiceNeXT, service.starlink"  
url="http://localhost:8021/RemotingSMS/ServiceNeXT.soap" />  
</client>
```

to

```
<client url="http://localhost:9021/RemotingSMS">  
<wellknown type="service.starlink.ServiceNeXT, service.starlink"  
url="http://localhost:9021/RemotingSMS/ServiceNeXT.soap" />  
</client>
```

Q. Remote management of EasySMS Outlook is possible?

A. NO remote management is possible.

Q. Always got message invalid mobile number, is any validation set for mobile number?

A. YES, mobile number validation set for 10 or 10 + digit numbers (e.g. +919415917612). if you require deferent mobile number validation contact to support team.

Q. Whenever I send command always got message *the underline connection was close: unable to connect remote server or unable to connect remote server* ?

A. this is due to service not available or invalid configuration. Find out correct configuration, service status from your NetShell /StarLink Administrator.

9.0 For More Information
