LightTable Quick Start Guide

- Install LightTable in your Applications folder and launch the application.

- From the File menu, select the "New" option to create a new untitled canvas.

- Click the "Add Images" icon on the toolbar to add images to the LightTable tray. Any images in the tray may be added to the canvas. Alternately, you may drag image files from the Finder or other image applications directly onto the LightTable tray or canvas.

- To move images from the tray to the canvas, you may simply select and drag the images to the canvas location you desire or you can click the "Move Images From Tray To Canvas" button on the tray controls (the left segment control, above the tray)

- Images on the canvas may be positioned, resized, aligned and layered using options on the Layout menu..

- A canvas may be shared, printed or exported by clicking the appropriate icons on the toolbar..

- Have Fun!
