

# QUICK START GUIDE

## 1) Install the software on the Windows Media Center PC

- Quit the Media Center software and go to the Windows XP Desktop, attach a mouse if needed.
- Double-click on the red installer file and follow the installation steps

## 2) (In some cases) install software on the mobile device

- In most cases, the videos will play on your device's built-in media player and you don't have to install anything.

-The mobile player **only** needs to be installed if you have one of the following devices:

- \* Nokia 3230, 3600, 3650, 3660, 6600,6620, 6630,6638, 6670, 6680, 6681, 6682, 7610, 7710, N70, N90, N-Gage,QD
- \* TOMTOM device (download the TomTom Video player from <http://www.makayama.com/TomTom.Video.Player.Demo.Installer.zip>)
- \* Palm Treo 600, 650, 680, 700p, TUNGSTEN C, E, E2, T, T3, T5, T|X, W, ZIRE 71, 72
- \* Sony CLIE TJ35, TG50, TH55, NX70, NX73, UX50
- \* Tapwave ZODIAC 1 & 2
- \* Garmin iQue 3-series (Palm-OS)

You will find the installation files and instruction in the zip-file you downloaded.

- If you have a different device, there's no need to install anything.

## 3) Start Media Center.

- You will see an extra item in the main menu, called 'Mobile TV Center', select it

## 4) You will be taken to the Device page.

- Choose your brand and model and press 'save'

## 5) Insert a memorycard (or connect your device via USB) and then select 'Storage'

- Press '**Find Drive**', the software will search the drive station that the memorycard or device represents. Press 'Save' when it finds the correct drive.
- Select **Done** and you're ready.

**All new tv-shows that you record (or schedule via the Electronic Program Guide) will be automatically converted and transferred to your device or memorycard.**
