

MovieBriefs Quick Start Guide

- Install MovieBriefs in your Applications folder and launch the application.
- From the **File** menu, you may click **Open** open. Select a movie. The document window opens and MovieBriefs begins generating a 5 by 5 overview of the selected movie.
- Adjust the time range slider at the bottom of the window to create an overview for a particular segment of the selected movie.
- To change the number of images or the quality of images, adjust the **Display Size** above the overview.
- To save the over to a file, click the **Export Image** icon on the toolbar. Clicking the **Share** icon will allow you to share the overview via e-mail or using popular internet services, like Facebook, Twitter, etc.
- MovieBriefs will generate a slide show of the individual images in an overview. Click the **Slide Show** toolbar icon to view the slide show.

Have Fun!
