

ScriptFire Revision History

This document contains details regarding improvements of the ScriptFire FileMaker plug-in.

ScriptFire version 1.0.5.28 for Windows and Mac OS

- Improved: ScriptFire now supports FileMaker 8.5 on all platforms including Intel Mac.

ScriptFire version 1.0.4.26 for Windows and Mac OS

- Improved: Special characters can now be used for task names.
- Fixed: When disabling the plug-in using the FileMaker Preferences dialog under Mac OS before setting any plug-in preferences FileMaker would crash. This has been addressed.

ScriptFire version 1.0.3.21 for Windows and Mac OS

- Fixed: The 'weekly' schedule type did not work as expected in earlier versions of ScriptFire.

ScriptFire version 1.0.1.19 for Windows and Mac OS

- Fixed: Previous versions caused a FileMaker 8 crash under Mac OS X 10.3 when FileMaker was quit. This has been addressed.

ScriptFire version 1.0.0.16 for Windows and Mac OS

- Improved: The underscore character (“_”) can now be used for task names.
- Fixed: Task blocking (SFire_SetTaskBlocking) was not supported by earlier versions. This has been addressed.
